IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions – All safety and operating instructions should be read before operating this speaker.
2. Keep these instructions – The safety and operating instructions should be retained for future reference.
3. Heed all warnings – All warnings on the speaker system and in the operating instructions should be adhered to.
4. Follow all instructions – All operating and use instructions should be followed.
5. Do not use this speaker system near water – These speakers should not be used near water or moisture, such as in a wet bathroom or near a swimming pool.
6. Clean only with a dry cloth. Avoid harsh solvents.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat or inhibit in any way the safety of the polarized power plugs. A polarized plug has two prongs, one wider than the other. A grounded plug has two prongs and a third circular grounding prong. The wide prong or the third circular prong improves the plug's safety. If the provided plug does not fit into your outlet, do not modify the plug in any way. Instead, consult an electrician and replace your power outlet to be compatible with these power plugs.
10. Protect the power cord from being walked on or pinched, particularly at the power plug, at the point of connection between the plug and outlet, and at the point of connection between the power cable and speaker.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the speaker. When a cart or rack is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug the speaker during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified personnel. Servicing is required when the system has been damaged in any way, such as when the power cord or plug is damaged, liquid has been spilled or objects have fallen into the speakers, they have been exposed to rain or moisture, they do not operate normally, or they have been dropped.
15. Do not install these speakers in a confined or closed-in space with little or no ventilation, such as a closed book case or similar unit. Ventilation should not be impeded by covering the speakers' ventilation openings with items such as newspapers, table-cloths, curtains, etc.

16. **WARNING:** To reduce the risk of fire or electric shock, do not expose this speaker system to rain or moisture. This system should not be exposed to dripping or splashing and objects filled with liquids, such as vases, should not be placed on the speakers.
17. **WARNING:** Make sure the system's power plug and the electrical outlet are easily accessible so the speaker system can be quickly disconnected from power in case of emergency.
18. This system is certified as Class II, a double insulated electrical appliance. It has been designed in such a way that it does not require a connection to ground (earth).
19. The equipment should be used at a maximum of 35° C (95°F) ambient temperature.
20. No naked flame sources, such as lighted candles, should be placed on the speakers.
21. A minimum distances of 5cm (1.97in) should surround the apparatus for sufficient ventilation.

This lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of non-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

Warning: To reduce the risk of electric shock, do not remove cover (or back) as there are no user-serviceable parts inside. Refer servicing to qualified personnel.

NOTE: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the product.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the product and receiver.
- Connect the product into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

To maintain compliance with FCC's RF exposure guidelines, this product should be installed and operated with a minimum distance between the radiator and your body of 20cm (7.9in). Use only the supplied antenna.

Product Description

Passive Speaker Active Speaker

Dual RCA to Dual RCA Audio Cable

3.5mm to Dual RCA Audio Cable

Connecting Cable

Rear View

1. Audio Input
2. Power Switch
3. Speaker Output
4. Power Cord

Side Control Panel

1. LED Indicator
2. Volume Dial
3. Treble Dial
4. Bass Dial
5. Headphone Jack

Included Items

- 1 x Speaker Set (2 Speakers)
- 1 x Connecting Cable
- 1 x Dual RCA to Dual RCA Audio Cable
- 1 x 3.5mm to Dual RCA Audio Cable
- 1 x Instruction Manual

Before using the 2.0 Multimedia Speaker System for the first time, check the package contents to ensure all parts are free of visible damage.

Connectivity and Operating Guide

1. Place the speakers symmetrically and equidistant from the listener, with the distance between each speaker and listener no less than 1 meter (3.28ft). Keep a distance of at least 20-30cm (7.87-11.8in) between the port openings on the back panel of each speaker and the wall or other objects.
2. Connect the active speaker and passive speaker using the included connecting cable (golden cable to red cable clamp and silver cable to black cable clamp).
3. Insert the audio cable into the audio input port on the back panel of the speaker and the other end of the cable into the output port of your PC, smartphone, tablet, MP3 player, DVD player, Turntable, etc.
4. Plug the power cord into a power outlet.
5. Adjust the speaker's Volume dial to the minimum level, switch the Power button On, and the LED indicator light will turn green.
6. Start playing the music/audio/media on your connected device and adjust the speaker's volume/base/treble level as desired.

Bluetooth Mode

1. Turn on your media device's Bluetooth and search for other active Bluetooth devices.
2. Select "1byone BS013" from the list of found devices on your Bluetooth device and input "0000" if a password is required.
3. You will hear a "ding" sound when pairing is successfully. You will now be able to play music/audio from your Bluetooth device wirelessly through the speaker system.

Note: After powering on, the speaker system will automatically search for the previously-paired Bluetooth device and connect with it. If it can't find the previously-paired device, the speaker system will automatically enter pairing mode. Please activate the Bluetooth of your media device before pairing with the speaker system.

Specifications

Output Power: 21W x 2
Voltage Supply: 120V~60Hz 0.6A
Speaker Units:
Woofer: 4"
Tweeter: 1"
Impedance: 4Ω
Frequency Response: 20Hz~20KHz
S/N Ration: ≥70dB
Separation: ≥40dB
Dimensions (W x D x H): 6.14 x 8.39 x 11.02in (156 x 213 x 280mm)
Weight: 10.9lbs (4.95kg)

Disposal

Disposal of the Product

Under no circumstances should you dispose of the product in normal domestic waste. This product is subject to the provisions of European Directive 2012/19/EU.

Dispose of the product via an approved disposal company or your municipal waste facility. Please observe currently applicable regulations. Please contact your waste disposal center if you need any further information.

The product's packaging is made from environmentally friendly material and can be disposed of at your local recycling plant.
