IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety precautions should always be followed, including the following:

READ ALL INSTRUCTIONS BEFORE USING KEEP AWAY FROM WATER

DANGER – As with most electrical appliances, electrical parts are electrically live even when the switch is off:

To reduce the risk of death by electric shock:

1. Always unplug it immediately after using.
2. Do not use while bathing.
3. Do not place or store appliance where it can fall or be pulled into a tub or sink.
4. Do not place in or drop into water or other liquid.
5. If an appliance falls into water, unplug it immediately. Do not reach into the water.

WARNING – To reduce the risk of burns, electrocution, fire, or injury to persons:

1. The dryer should never be left unattended when plugged in.
2. Close supervision is necessary when this appliance is used by, on, or near children or individuals with certain disabilities.
3. Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.
4. Never operate this appliance if it has a damaged cord or plug, if it is not working properly, damaged, or dropped into water. Return the appliance to a service center for examination and repair.
5. Keep the cord away from heated surfaces. Do not wrap the cord around the appliance.
6. Never block the air openings of the appliance or place it on a soft surface, such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint, hair, and the like.
7. Never use while sleeping.

8. Never drop or insert any object into any opening or hose.
9. Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
10. Do not use an extension cord with this appliance.
11. Do not direct hot air toward eyes or other heat sensitive areas.
12. Attachments may be hot during use. Allow them to cool before handling.
13. Do not place appliance on any surface while it is operating.
14. While using the appliance, keep your hair away from the air inlets.
15. Do not operate with a voltage converter.

This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature. HOUSEHOLD USE ONLY.

SAVE THESE INSTRUCTIONS OPERATING INSTRUCTIONS

The dryer is equipped with a Appliance Leakage Current Interrupter (ALCI), a safety feature that will not allow the dryer to operate in the event of immersion in water. To make sure the ALCI is functioning properly, simply place the plug into the outlet and press the test button located on the plug. CHECK ALCI EVERY TIME YOU USE THE DRYER. Unplug dryer at the end of use.

Appliance Description

1. Concentrator Attachment
2. Air Outlet
3. Filter
4. Cool Air Button
5. Heat Level Switch
6. Air Flow Level Switch
7. Ionic Switch
8. Hanging Loop
9. Diffuser Attachment

Low heat level	COOL	OFF Off
Medium heat level	WARM	LOW Medium air flow
High heat level	HOT	HIGH High air flow

Note:

Please make sure the dryer is switched off before connecting to power.

- 1) Connect the power cable plug into a power outlet of the correct specification.
- 2) Switch the hair dryer on (to Medium air flow or High air flow).

Both heat level and air flow strength are separately adjustable.

Heat level and air flow options:

COOL	Low heat level	OFF	Off
WARM	Medium heat level	LOW	Medium air flow
HOT	High heat level	HIGH	High air flow

- 3) After use, switch the dryer off (position "0") and remove the power plug.

Drying and Styling Hair

- Drying: We recommend using high air flow and high heat level with Ionic switched on.
- Hair styling: After drying, use medium air flow and medium heat level to style your hair. The included concentrator and diffuser can be attached to assist in hair styling. When attaching, make sure the concentrator or diffuser is evenly fitted into the dryer's air outlet.

Cool Air Button

No matter the set heat level and air flow, press and hold the Cool Air button to immediately reduce the heat level.

Ionisation Function

When drying your hair with the Ionic setting switched on, your hair should become soft, supple, shiny, and easier to style.

Cleaning

To reduce the risk of electric shock while cleaning:

- Always remove the power cable plug from the power outlet before cleaning the dryer.
- Do not immerse the dryer in water or other liquids when cleaning it.
- Make sure the dryer is completely dry before turning it back on.

To reduce the risk of injury:

Please let the dryer cool before cleaning.

Storage

To reduce the risk of damage:

- Store the hair dryer in a dust-free and dry place.
- Make sure the dryer has completely cooled before packing for travel.
- Clean the hair dryer as described in the "Cleaning" section.

Specifications

Rated Voltage: 125V~ 60Hz
 Rated Power: 1875W

Disposal

Disposal of the appliance

 Under no circumstances should you dispose of the appliance in normal domestic waste. This product is subject to the provisions of European Directive 2012/19/EU.

Dispose of the appliance via an approved disposal company or your municipal waste facility. Please observe currently applicable regulations. Please contact your waste disposal center if you need any further information.

 The appliance's packaging is made from environmentally friendly material and can be disposed of at your local recycling plant.

WARNING

**IMPORTANT
MESSAGE
TO
CONSUMERS**

**THIS MESSAGE IS ABOUT
GROUND FAULT CIRCUIT INTERRUPTERS
CAN SAVE A LIFE**

IF YOU MUST USE YOUR HAIR DRYER IN THE BATHROOM, INSTALL A GFCI NOW!

Your local electrician can help you decide which type is best for you - A portable unit that plugs into the electrical outlet or a permanent unit installed by your electrician. The National Electrical Code now requires GFCI's in the bathroom, garages, and outdoor outlets of all new homes.

WHY DO YOU NEED A GFCI?

Electricity and water don't mix. If your hair dryer falls in water while it's plugged in, the electric shock can kill you... **even if the switch is "off."** A regular fuse or circuit breaker won't protect you under these circumstances. A GFCI offers you far greater protection.

**A GFCI CAN SAVE YOUR LIFE!
COMPARED TO THAT, THE PRICE IS SMALL!
DON'T WAIT...INSTALL NOW!**
